MANAGE INPUT FOR SIX DEVICES WITH IOGEAR MULTI-LINK BLUETOOTH KEYBOARD WITH TOUCHPAD

IOGEAR's Multi-link Bluetooth Keyboard with Touchpad (GKM611B) can wirelessly switch between six Bluetooth enabled devices, providing convenient management of HTPCs, gaming consoles, smart phones and more.

Las Vegas, NV – International CES 2011 – January 6-9 – Central Hall #13427 –

Continuing their pursuit of connectivity through convergence, [IOGEAR](#) today introduced the Multi-Link Bluetooth Keyboard with Touchpad (GKM611B) for wireless management of up to six Bluetooth enabled devices. Data input for social media, gaming or even board rooms has reached a new level.

Entertainment, productivity and communication blend more seamlessly with a single data input device. Bluetooth 2.0 technology in the GKM611B provides a 30-foot radius of operability allowing the IOGEAR™ Multi-Link Keyboard to go from couch to kitchen table or conference room to office, switching between different devices with ease.

Once a user switches to the desired Bluetooth-enabled device, custom hotkeys provide even greater convenience with push-button access and management of: My TV, videos, pictures, music, Internet browser, volume control and more. An Integrated touch pad with left and right mouse buttons adds additional flexibility since users are not required to keep a separate mouse in tow when switching between devices.

Complementing the functionality is an ultra-slim and low profile design that allows users to type with style and comfort from any angle in the room. Ergonomically designed for many different laps and surfaces, the GKM611B also features a slip resistant base, two AA batteries and weighs only 1.90 lbs for painless toting.

“Wireless keyboards are appealing because users aren’t tethered to a machine while operating,” states Bill Nguyen, senior marketing manager for IOGEAR. “Our new multi-link Bluetooth keyboard offers this same comfort for six separate devices, providing freedom to move around or stay seated while staying connected.”

IOGEAR’s Multi-Link Bluetooth Keyboard with Touchpad will be shipping late in Q1, 2011.

MSRP of the GKM611B is \$79.95.

About IOGEAR

IOGEAR, headquartered in Foothill Ranch, Calif., manufactures innovative Home Electronics and Information Technology solutions that enable convergence through connectivity. Founded in 1999, the company develops products that help integrate technologies, share resources, decrease clutter and energy consumption, and reduce electronic waste. IOGEAR distributes throughout North and South America, Europe and Asia.

The company emphasizes the conservation of natural resources to both employees and customers through its GREEN initiatives program and “Road to a Million Trees” campaign. In partnership with Trees for the Future, one tree is planted for every product purchased on the IOGEAR site or through an IOGEAR GREEN initiative partner.
