# Wireless 5x2 HD Matrix

IOGEAR's Wireless 5x2 HD Matrix Allows Users to Add Another TV Anywhere in the House or Outside Patio

**Case Study** **Home**

## Overview

With more homes adding an additional HDTV, users are increasingly looking to get their entertainment in another location of the home or even set up an outdoor patio entertainment space. The idea of having to buy duplicate source devices, buy / run wires, tear down walls or drill holes becomes a burden and costly.

- Deliver content to 2 HDTV's, one being the additional HDTV in a different location of the home.
- Transmit HD video over long distance – to the bedroom and or outdoor patio.
- Ability to view separate sources at the same time to create 2 completely separate entertainment spaces.
- Compatible with latest HDMI source devices and HD video – support for older component devices.
- AV distribution needs to be easy to set up, convenient and reliable.

## IOGEAR Solution

### GWHDMS52 Wireless 5x2 HD Matrix

- Wireless fully uncompressed HD video up to 100 feet through standard home walls for 2 HDTV's
- Built in 5 x 2 Matrix - Allows you to switch and independently select any of 5 sources between 2 HDTV's
- Connect and wirelessly transmit content from your Blu-ray / DVD player, DVR / Cable box, Game console, Computer / laptop and media player
- Supports full uncompressed HD 1080p, 3D content and 5.1 channel digital audio
- Built-in Infrared (IR) pass-through allows user control over their source devices that are in a different location

## Benefits

- **Content effectively delivered to desired locations** – Flexible solution simplified content management between 2 locations without the need of purchasing duplicate equipment.
- **Seamless wireless HD distribution up to 100 feet** – Content is now delivered more efficiently without the need of dreadful construction costs and unsightly cables and wires.
- **Separate HD audio video signals managed between 2 locations** – Matrix switching between HDMI and component devices solves the need to distribute separate content to different locations.
- **Wireless AV serves as a robust and reliable solution** – Plug-n-play design makes it convenient for an effective and flexible AV distribution solution.
