

Bluetooth with NFC Audio Receiver

GBNAR3

Wireless Audio

Play your favorite music and movie audio wirelessly from your Bluetooth-enabled smartphone or tablet on your home A/V receiver and or home stereo. You now have the wireless entertainment freedom to listen to your favorite music, online audio stations or favorite videos / movies audio on your home surround sound. The IOGEAR Bluetooth with NFC Audio Receiver provides 3.5mm audio out along with Optical out to accommodate your home audio set up.

Bluetooth / NFC

If your smartphone or tablet supports NFC (Near Field Communication), you can enjoy an even more simpler way to wirelessly connect; just tap it with the IOGEAR Bluetooth with NFC Audio Receiver for an instant connection to start streaming your music and or video / movie audio; up to 30ft away. Even better, it supports up to eight devices giving family and friends easy connection to share the music and enjoy the party.

Great for users with an iPad, iPhone, iPod, and or Android devices that are Bluetooth audio enabled. For NFC tapping feature, your devices need to be Android 4.1 or later.

Bluetooth with NFC Audio Receiver
