

G2L5206P

PS/2 KVM Cable 20 Ft

The cables connecting your PS/2 computers to your GCS1716 KVM switch determine the quality of communication between the CPUs and the switch. Our custom-made cables are designed to provide the highest signal capacity with the lowest signal loss. This important technology produces the highest quality video output - even after long distance transmission or in the most electronically noisy environments such as server cabinets. IOGEAR's premium custom-made KVM cables guarantee optimum signal integrity for high-grade server needs. The keyboard and mouse cables are made of double-sealed 22-gauge wire and are neatly wrapped with a heavy-duty video cable for simplified connections.

- IOGEAR custom made KVM cables maintain the signal's optimal integrity and quality
- Convenient and functional cable design with double-shielded 22 gauge for keyboard, mouse and a UL-2919 video cable.

How does it work?

Requirements

- A GCS1716 KVM Switch
- Computers with PS/2 and VGA connections

Package Contents

1 x 20ft PS/2 KVM Cable
