

G2LDI006

6ft (1.8m) Dual Link DVI-I Male to Male Cable

IOGEAR's DVI-I Dual-Link digital / analog video cable provides six feet of digital video connectivity between digital devices such as your DVD player or set top box to your HD TV / display. Digital Visual Interface (DVI) is the standard interface for a high-performance connection with PCs, flat panel displays, digital CRT displays, projectors, and HD TVs.

IOGEAR's DVI-I Dual-Link digital / analog video cable incorporates Transition Minimized Differential Signaling (TMDS) technology for transmitting high-speed data. Supporting ultra-high 2560 x 1600 resolution it performs transfers of uncompressed digital video data. High quality construction eliminates the possibility of resolution distortion or noise. The DVI-I cable is also fitted with Gold-Plated Dual Link DVI-I connectors.

- Supports resolutions up to 2560x1600 @ 60Hz
- Gold-Plated Dual Link DVI-I connectors
- High Quality: custom designed for high video quality
- Transition Minimized Differential Signaling (TMDS)

How does it work?

Requirements

- HD TVs or displays with DVI-I connectors
- Digital devices with DVI connectors

Package Contents

1 x 6ft Dual Link DVI-I Cable
