Solar Bluetooth Caller Announce Hands Free Car Kit

More convenient driving is in your future with the new IOGEAR Solar Bluetooth Caller Announce Hands Free Car Kit, never get blindsided by unwanted calls again!

After pairing your Bluetooth enabled mobile phone, the unit will automatically download all your contacts from your phone's contact list. When a phone call is received the Solar Bluetooth Call Announce Hands Free Car Kit will clearly announce the person's name. Know exactly who's calling before you speak with them. Accept only the calls you need and send unwanted calls straight to your voicemail without callers ever knowing they were screened. This "Call Announce" function is also known as text-to-speech. The unit also features clear vocal feedback that will let you know, "power on", "phone is ready for use", "pairing successful" among other informative messages. Inbound calls are clearly announced. All this is accomplished without wires and with just one tap of the large master function button. This allows you to stay focused on the primary task of driving.

After the initial AC charge, the kit's integrated solar panel harnesses free solar energy in order to stay powered. A small LED will illustrate when the unit is receiving enough sunlight for charging; truly an eco-friendly device.

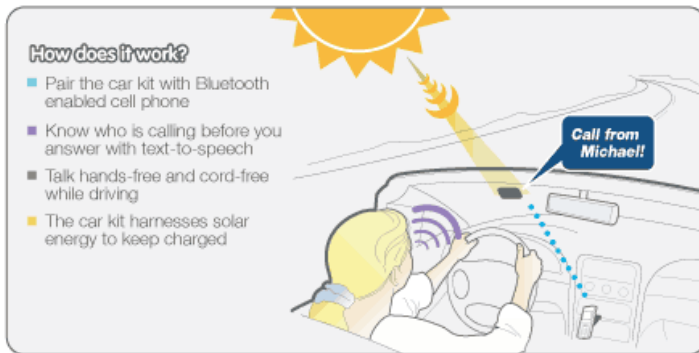

- Enjoy hands-free talking with the solar-powered Bluetooth speakerphone
- Caller announce for inbound calls
- Voice announce language support in; English, French, Spanish, German & Italian
