GCS1758KIT

8-Port Miniview Ultra+ Combo VGA KVMP with USB cables

IOGEAR's 8port Miniview Ultra+™ Combo VGA KVM switch is the ideal tool to help reduce redundant hardware. Eight monitors, mice and keyboards are simply too expensive, bulky and inconvenient for most system administrators. Control up to 512 computers with a single keyboard, monitor and mouse. The added audio support allows you to enjoy music while working. Just think of the time, space and money you'll save, and added fun. The 8-Port Miniview Ultra+™ offers dual interface support, allowing you to connect both PS/2 and USB computers on the same switch. The multi-platform support allows you to control Windows® based computers, Sun Solaris™ systems, Linux, or even Macs. IOGEAR extended the multi-platform support by supporting the special keys on both Sun and Mac keyboards. This Combo VGA KVM switch also comes with the IOGEAR VSE technology, which provides excellent video resolution - up to 2048 x 1536. Built-in AutoScan mode lets you conveniently monitor every attached computer for a specified amount of time, while On Screen Display (OSD) technology allows you to assign a unique name to each computer and access it via a smooth menu-driven interface. With its 1U, 19" rack-mountable casing and status-monitoring LEDs, the Miniview Ultra+™ is the perfect switch for your server room or any other multi-computer environment.

- Supports both USB and PS/2, VGA computers
- 8 (4 ten ft and 4 six ft) cables included
- Multi platform support - Windows®, Mac, and Sun Solaris™
- Cascade compatible - support up to 512 computers via 3 levels of cascading
