USB Laptop KVM Switch with File Transfer

The USB Laptop KVM with File Transfer is the latest innovation from IOGEAR. Leveraging the convenience of an all-in-one USB cable the Laptop KVM allows you to gain access with complete control, easily work and switch between two computers on 1 monitor, and file transfer between the two computers connected. It allows the user to seamlessly control a secondary computer such as your netbook with a laptop or desktop PC as the console*. It is ideal for people who own a laptop, netbook, and an older desktop PC and wish to keep using both for various functions or applications. Control a desktop PC, laptop and even your netbook!

The KVM features an on-screen toolbar with multiple functions such as desktop image scaling, full screen, file transfer, and others. With its desktop image scaling, a user can adjust the resolution of the remote screen for the best possible viewing with just the click of a button. The built-in file transfer utility lets the user transfer files, presentations, business information and create backup copies between both computers or from external USB storage devices. The extra USB port provides a means to connect a USB peripheral device, such as an external hard drive or a printer.

Overall the GCS661U offers a complete easy to install out-of-box, Plug & Play solution with no additional cables or software needed.

- Control and work on 2 computers conveniently at the same time on 1 screen
- Use your desktop's larger monitor and standard-size keyboard to control your Netbook
- Portable all-in-one cable design (USB 2.0)
- Desktop Image Scaling - Automatically resizes desktop image onto your screen
- Built-in File Transfer Utility for backing up, updating, and transferring files between the connected computers
- On-screen one click switching
- 1 USB 2.0 port for USB devices, such as a printer or a storage drive
- Supports Windows XP, Windows Vista 32-bit / 64-bit
- Plug & Play; No power adapter needed
- 3-year Limited Warranty

How does it work?

- Connect one end of the KVM USB cable to your laptop
