

GCS932U

MiniView™ Micro DVI-D KVM with Audio and Cables

The two port GCS932U Mini View Micro USB DVI + Audio, KVM switch from IOGEAR represents a simple method for sharing one DVI monitor, Mouse, Keyboard, Speaker set and Microphone between two computers. The GCS932U employs two switching methods.

The first is a simple remote switch that allows one tap switching, and it's remarkably small size allows placement in any convenient location on your desk.

The second method is by hotkeys, the hotkeys provide the means to independently switch control and audio functions between computers. Listen to music from one computer while working on the other.

- Control 2 computer with one keyboard, mouse and monitor
- 2-Port DVI KVM, cables included
- Video resolution: 1920x1200 @60Hz
- Switch between computers via remote switch button or hotkey*
- Reprogrammable hotkey activation for keyboards without a Scroll Lock key
- Mouse and keyboard emulation for error-free boot-up and instantaneous recognition when switching computers
- Plug-N-Play
- Supports two button scroll wheel mice, MAC keyboards and most other Wireless keyboard / mouse sets
- LEDs allow for easy status monitoring
- Molded-in cables to simplify setup

* Hotkey allows independent (asynchronous) switching

Requirements

Package Contents

Console

- A DVI monitor capable of the highest resolution that you will be using on any computer in the installation
- A USB style keyboard and mouse
- Speakers and microphone (optional)

- 1 x GCS932UW6 KVM Switch
- 1 x Remote switch
