

GIC711S

1 Internal + 1 External SATA 1.5Gbps Dual Profile PCI Card

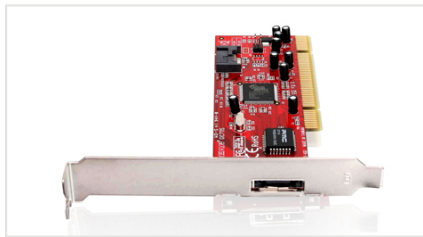

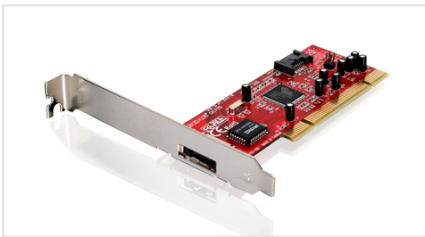

Ultra-fast SATA is 3 times faster* than Hi-Speed USB 2.0 and FireWire 400

The SATA 1.5Gbps Dual Profile PCI Card adds 1 internal and 1 external SATA port to your desktop computer. It is great for users who want to add SATA connectivity to their computers but do not want to buy a whole new computer. Devices commonly used with this host adapter are next generation hard drives, DVD drives such as Blu-ray optical drives, HD-DVD drives and personal media centers. The dual profile design of this adapter makes it fit into low profile or standard cases.

*Performance derived from standard specifications. Actual performance may vary and depends on many conditions and variables, including PC performance, file size, and other settings.
