

GKB704RGB

HVER RGB Aluminum Gaming Keyboard

- RGB multi-zone backlight with 17 lighting patterns
- Brushed aluminum chassis provides a solid, flex-free platform
- Simple key customization with programmable software
- 3 User profiles to record macros and set backlighting*
- Double injected keycap characters never wear off

RGB Gaming Keyboard with Hover Key Design

Kaliber Gaming is excited to announce the HVER RGB Aluminum Gaming Keyboard the newest addition to the hugely successful HVER keyboard family. The HVER models get their name from the open frame design with elevated keys that appear to "hover" above the brushed aluminum chassis. Already known for good looks, HVER RGB builds on the success of the original models adding multi-zone RGB LED backlighting with multiple lighting patterns, plus the ability to set the backlight color to match your other gaming gear*.

Like all HVER models, the HVER RGB is designed to provide everything gamers need at a price that won't break the bank. HVER RGB carries on the plunger key design that provides a mechanical keyboard-like feel, and also includes the premium double injected keycaps that deliver a lifetime of performance without the tops ever wearing off. In addition to the standard HVER features like 26 anti-ghosting keys, Windows key lockout and heavy-weight gaming base, the HVER RGB also adds the ability to program individual keys as macros for in-game use or shortcuts to system controls, PC functions, etc.

*Requires Kaliber Gaming PC software

- RGB zone backlighting with 13 lighting patterns
- Brushed aluminum chassis provides a solid, flex-free platform
- Simple key customization with programmable software
- 3 User profiles to record macros and set backlighting*
- Double injected keycap characters never wear off
- 26 Anti-Ghosting keys so you never miss a keystroke!**
- Windows key lockout prevents accidental menu pops

- Plunger key design delivers a similar feel to mechanical switches
- Heavy weighted base for added stability when gaming

*requires free Kaliber Gaming user interface software download

**26 Anti-Ghosting keys refers to the following keys covering most 3-key combinations used in gaming: Q, A, Z, W, S, X, E, D, C, B, R, F, V, T, G, M, Caps Lock, Space, ?(UP), ?(Down), ?(Left), ?(Right), Tab, L-Ctrl, L-Shift, L-Alt.
