GKB705

Kaliber Gaming IKON II Gaming Keyboard

- Membrane style 124-key gaming keyboard
- Zone-RGB backlight with multiple lighting patterns
- 6 Programmable G-keys for up to 18 macro functions, shortcuts, etc.
- Built-in volume control/lighting control wheel
- Magnetically attached, self-centering palm rest
- Dedicated media function controls
- 3 User profiles allow up to 18 macro configurations for different games or functions
- Kaliber Gaming software to set custom keyboard functions
- 28 Anti-ghosting keys
- Windows key lockout prevents menu pop-ups while gaming
- W-A-S-D keys and arrow keys can be swapped in-game for MMO players and left-handed gamers

Powerful Macro Keys

Record up to 6 macro functions (a series of keystrokes with only a single press) or shortcuts via the dedicated G-keys. With three user profiles you can add up to 18 macros to make the experience much more accessible from game to game or program to program. While the FREE Kaliber Gaming IKON II software offers the ability to build quick tools for common game commands, its also perfect for simplifying text shortcuts or executing multi-key commands in everyday use while typing.

Multi-Function Control Wheel

The multi-function control wheel alternates between changing the volume level to RGB lighting intensity without the need for additional software. The wheel features a textured metal design which feels smooth to the touch, but has enough grip to actuate when needed without being uncomfortable to use. The wheel also provides faster adjustment with a greater level of precision than buttons.
