Perfect Keyboard for Work and Play

Kaliber Gaming™ by IOGEAR HVER STEALTH Gaming Keyboard improves on the original RGB mechanical HVER series with updated cosmetic design featuring a rounded and brushed aluminum top plate, 360-degree edge lighting and the namesake hover-style RGB back-lit key. The enhanced brown boxed-style mechanical switches offer accurate, tactile feel while also delivering a quieter but still pronounced keystroke that confirms every actuation. The keyboard also features N-key rollover anti-ghosting technology so you can enjoy reliable gaming without worrying about a keystroke not registering. The HVER STEALTH also features Kaliber Gaming advanced software allowing macro programming and lighting control for a truly customizable experience.
