

GKMB01

Bluetooth Desktop Dock

The IOGEAR Bluetooth Desktop Dock allows you to share your favorite desktop keyboard and mouse with up to 2 Bluetooth enabled mobile devices, and at the same time still use the keyboard and mouse for your desktop applications*. The built-in stand fits most smartphones and tablets, even with a case!

The IOGEAR Bluetooth Desktop Dock is ideal for multitasking professionals to consolidate a computer, tablet and/or smart phone into a single connected work area. Typing emails, text messaging, creating documents and working on spreadsheets all become seamless and efficient via a single keyboard and mouse set. Think of it as a Bluetooth KVM or more accurately a Bluetooth KM since it does not require video switching.

The Bluetooth Desktop Dock is easy to set up and use, supporting both PC and Mac keyboards. The Dock also supports device specific hot keys so for example you can use F8 to Play/Pause music on your iPhone®, hold ESC to access Siri, press Windows key+E to launch email on your Nexus 7™, etc. With the Bluetooth Desktop Dock connected, you can even text or send email at work without anyone knowing!

- Share your wired keyboard and mouse with up to two Bluetooth devices such as smart phones and tablets
- Quickly switch desktop keyboard to mobile devices for faster texting, emailing etc.
- Compatible with iPad®, iPhone®, Galaxy Tab®, Google Nexus® and other mobile devices
- Built-in stand holds your tablet or smart phone at the proper viewing angle
- Easily switch keyboard and mouse focus between devices via hotkeys
- Supports PC and Mac keyboards
- USB hot pluggable

How does it work?

- Connect your keyboard and mouse to the Bluetooth Dock
- Connect the Bluetooth Dock to the computer.
- Pair your bluetooth devices with the Bluetooth Dock.
- Switch the Bluetooth Dock among the 3 devices via hot keys
