## KeyShair - Bluetooth Keyboard / Mouse sharing for smartphones and tablets

### Use your computer's keyboard and mouse with your mobile devices

The IOGEAR KeyShair Bluetooth Keyboard/Mouse Interface for Tablets & Smartphones allows you to use your computer's keyboard and mouse with up to four Bluetooth enabled mobile devices, for faster texting, emailing, etc. By incorporating hotkey switching, the KeyShair allows you to quickly and easily change the focus of your computer's keyboard and mouse between the computer and up to four smartphones, tablets or other Bluetooth HID enabled devices. The KeyShair features a compact USB stick-style form factor so it slips easily into your briefcase, backpack or even attaches to your keychain.

KeyShair is ideal for multitasking professionals to consolidate computers, tablets and/or smart phones into a single connected work area. Instead of picking up your phone and pecking your way through numerous text messages throughout the day, you can simply switch the your computer's keyboard focus to your mobile device and type as if responding from your computer. IOGEAR's KeyShair also provides cut and paste integration from computer to Bluetooth device. Now you can find that contact in Microsoft Outlook® or copy some text from a Word® document, and more. directly into your mobile device.

IOGEAR's KeyShair Bluetooth Keyboard/Mouse Interface is easy to set up and use, with built-in software that requires no special setup discs or driver installation- just plug it into any computer's USB port and it does the rest. KeyShair works with both PC and Mac keyboards, and is compliant with Bluetooth HID enable mobile devices such as iPad®, iPhone®, Galaxy Tab®, Galaxy S® series smartphones and more. The KeyShair functions similarly to a KVM switch between computers, except the KeyShair switches between up to 4 devices wirelessly- basically a Bluetooth KM switch! For mobile users that also carry a laptop, now there is no need to carry a separate Bluetooth keyboard.

\* Some mobile devices do not support mouse function, please consult your mobile device manufacturers for details.

Microsoft Outlook and Microsoft Word are registered trademarks of Microsoft Corporation in the United States and/or other countries.

- Share your computer's keyboard and mouse\* with up to four Bluetooth enabled mobile devices
