

GME227RW6

Wireless Laser Mouse

IOGEAR's new Wireless Laser Mouse is an excellent tool for medical offices, libraries, and schools as well as for mobile professionals, gamers, and desktop users.

This new IOGEAR mouse uses VCSEL (Vertical Cavity Surface Emitting Laser) as the light source, which provides 28x more tracking power than mice using an optical sensor. VCSEL allows the mouse to work on virtually any surface and provides an extremely high resolution of 1600dpi, substantially reducing the amount of injury-producing hand and arm movement. IOGEAR's Wireless Laser Mouse is USB ready, Plug-n-Play, and Hot Pluggable. It provides a 6 feet (2 meter) wireless range, and it is also backed by IOGEAR's 3 Year Limited Warranty.

- Advanced laser technology provides 28x more tracking power
- Ergonomically contoured design for comfortable use
- Works on almost any surface
- On/Off switch for power saving
- Uses very little real estate on your workspace -- needs only a few inches for accurate movement
- 6 feet (2 meter) wireless range
- Solid 3 Year limited warranty parts and labor

Requirements

Windows
2000, XP, Vista
Available USB port

Mac OS X
10.2 or later
(For Mac 9.x or earlier, works only as a one button mouse)
Available USB port

Package Contents

1 Wireless Laser Mouse
1 Transmitter
1 Carrying Case
1 Warranty / Registration Card
