

GME557R

E7 Multi-Mode Wireless Mouse

IOGEAR is pleased to announce the arrival of the E7 Wireless Mouse. This sleek device is packed with features designed to make your life more efficient and productive.

The E7 is an optical mouse that can work from up to 33 feet away from your computer. When not in use, the low profile nano receiver can store conveniently in the battery compartment. The battery compartment also has slots for two AA batteries. Although only one battery is needed for the mouse to function, there are two benefits for using a second battery- you won't have to change your batteries for up to a year*, and the weight of the second battery provides a steadier feel for precision work.

With the E7 Wireless Mouse, you will also have the ability to change the DPI and User Modes on-the-fly at the swift touch of a button. This will allow you to customize the user experience based on the applications you are engaged with on the computer. As you switch between the three User modes, a subtle LED will glow on the scroll wheel to indicate the current setting. Each color defines a specific User Mode pre-programmed to optimize the mouse for Gaming, Precision work or Power Saving use.

How does it work?

Insert one or both of the included AA batteries then turn on the mouse. The mouse enters sleep mode to preserve the battery life when it is not in use, and reactivated when the hand gets really close to the mouse, but barely touching the mouse.

Requirements

- Available USB port on the computer;
- USB HID supporting operating system such as Windows and Mac.

Package Contents

- 1 x E7 Wireless Mouse
- 1 x USB Nano Receiver
- 2 x AA Batteries
- 1 x Carrying bag
- 1 x Quick Start Guide
- 1 x Warranty Card
