- 9 programmable buttons with custom programming software
- Non-slip rubber coated click wheel and thumb rest
- Up to 5000dpi with shift-on-the-fly adjustment
- Sniper button- instantly increases aim accuracy

eSports Pro FPS Optical Gaming Mouse

Kaliber Gaming by IOGEAR's RETIKAL Pro FPS Gaming Mouse is a pure-bred gaming beast, specifically built to dominate first-person-shooter games. The RETIKAL's tournament-grade optical gaming sensor provides a huge step up in accuracy, allowing much more precise shots, especially when aiming-down-sight. In addition to its tournament-grade sensor, the RETIKAL also features a dedicated sniper button that changes mouse dpi while pressed, making head shots much quicker and easier. RETIKAL's built-in memory stores up to five different mouse profiles, and allows you to change every single programmable option from RGB backlight color and dpi steps to macro functions with a single click. With five programmable steps up to 5000 dpi, RETIKAL is great for low sensitivity FPS gamers and has more than enough resolution for even high sensitivity 4K Ultra HD gaming.

5000 dpi Optical Sensor

Program up to 5 different dpi settings and instantly shift between them with the press of a button

9 Programmable Buttons

Use the Kaliber Gaming software to program up to 9 buttons with macros or custom functions

Precision Sniper Button

The thumb-accessible sniper button delivers an instant increase in aiming accuracy
