# Multi-Function Print Server, USB

IOGEAR's palm-sized USB Multi-Function Print Server allows any networked computer to share a USB Multi-Function Printer (MFP). This multi-function server goes a step beyond ordinary print servers by allowing multiple network users to Print, Scan, and Fax using the same Multi-Function Printer. This eliminates the need to purchase multiple expensive multi-function printers as well as frees you from having to use a dedicated computer for printing.

It complies with USB 1.1 specifications, and provides users with an auto-sensing 10/100Base-T port. The print server will even automatically identify your printer make/model upon connection. The built-in web management feature provides more convenience by allowing the user to configure, monitor and even reset the print server via a web browser. GMFPSU01 Printer Compatibility List
