## USB Print Server, 1-Port

IOGEAR's palm sized 1-port USB Print Server allows any networked computer to share an USB printer. It complies with USB 1.1 specifications, and provides users with an auto-sensing 10/100Base-T port. It works with either 10BaseT or 100BaseT networks. This unit also supports multiple protocols and multiple operating systems, and it integrates Internet Printing Protocol (IPP) in this print server to allow users to print from any computer over a LAN/WAN or the Internet by specifying the device's URL. The built-in web management feature provides more convenience by allowing the user to configure, monitor and even reset the print server via a web browser. This eliminates the need to place the printer right next to the computer. Print jobs can be sent to a printer in another country just as easily as to a printer in the same office. Why bother sending a degraded fax image while you can print an original at the destination?

- Easily connect your USB printer to a network
- Allows multiple computers to share one USB printer on the network
- Print from any computer on your network or from across the Internet
- Supports DHCP Client and multiple network protocols
- 10/100Mbps auto-sensing
- Supports Telnet and Web Management software
