Accu-Tip Stylus for Tablets and Smartphones

Drawing and Painting

Both digital artists and novice doodlers alike will appreciate the Accu-Tip Stylus' small 4.5mm touchpoint. When working inside digital painting or drawing apps, the IOGEAR Accu-Tip Stylus exposes more of the screen area around the tip, so it is much easier to work in smaller detail.

Digital Document Signatures

The Accu-Tip Stylus allows a more accurate stroke which is perfect for signing digital credit card purchases or banking documents. Instead of jagged lines or odd looking handwriting when using a finger or traditional large tip stylus, the resulting signature from the Accu-Tip Stylus looks much more pen-like and easy to reference.

All Metal Body Construction

The metal housing of the Accu-Tip Stylus feels very solid in hand, similar to a fine writing instrument. The balanced weight provides a comfortable feel for long periods of use as when taking notes in class or drawing pictures. Additionally, the body is extremely durable and will not bend or break in the bottom of backpacks and book bags.

- 4.5mm AccuTip Stylus for better accuracy and better on-screen visibility
- Soft, durable rubber Accu-Tip will not scratch, smudge or leave fingerprints on your screen
- Metal body construction adds rigidity and weight for a more consistent feel
- Professional quality stylus for business and everyday use
- Great for digital signatures, digital drawing, etc.

Requirements

- Any capacitive touchscreen device

Package Contents

- 1 x AccuTip Touch Point Stylus
