PenScript™ Active Stylus for Smartphones and Tablets

Natural writing for smartphones and tablets

Active Stylus for Smartphones and Tablets

With today's ever-shifting transformation towards a paperless world, we rely more than ever on our electronic devices to carry out daily activities such as sending emails, taking notes or running businesses. IOGEAR's PenScript™ Active Stylus sets out to redefine the way we interact with our touchscreen and mobile devices.

Break free from the standard, large rubber tip stylusses, with the PenScript's precise 1.9mm POM tip:

- Unparalleled accuracy
- Glides effortlessly over glass displays
- Actively responds to touch-detection

The sleek design with integrated rubberized grip fits naturally into the hand for comfort while you draw, write, and navigate through your tablet or smartphone.

What is an Active Stylus?

An active stylus is an input device that allows the user to write or draw directly on a device's screen. It is usually used for precise drawing, note-taking, annotating electronic documents or providing electronic signatures. Active styluses have evolved from older inactive styluses that contain no electronic components and feature a large rubber conductive tip that lacks the accuracy and features that an active stylus, such as the IOGEAR PenScript™ provides.

- Precise 1.9mm tip with Power Tip Technology for smooth writing and unparalleled accuracy
- Anodized aluminum body for durability and premium feel
- Works with virtually all smartphones and tablets*
- Up to 12 hours of continual usage on a single AAA battery

- Easy setup - no pairing or additional software needed
- Great for artists, designers, students and businesses
- Works with the most popular note-taking apps such as Evernote, Paper by FiftyThree, Procreate, etc.

*GSTYA100 is compatible with iPad Pro only for S/N starting from O84USSC100001

IOGEAR®

How does it work?

■ Turn on the GSTYA100 by pressing the power button located on the grip
■ Now you can use the active stylus to take notes, provide e-signatures, etc. on your smartphone or tablet

Requirements
