Executive Stylus Pen for Tablets and Smartphones

If you really like your smart device, stop giving it the finger! IOGEAR's Executive Stylus & Pen is much more accurate than a finger for drawing, double tapping, playing games and taking notes, but unlike a finger it does not leave smudge marks. Featuring a comfortable, wide-body grip and all metal construction for a balanced feel in hand, the Executive Stylus & Pen is an essential tool for the new generation of business professionals.

The Executive Stylus & Pen is an excellent writing utensil for daily use, but when note taking shifts from paper to electronic media such as an iPad®, iPhone® or other smart device, simply remove the cap and flip the body for the touchscreen stylus.

While the heavy duty construction of the IOGEAR Executive Stylus & Pen is designed to provide many years of service, the ink will need refills from time to time. To make finding replacement ink cartridges fast and painless, the Executive Stylus & Pen is compatible with Parker® brand refills.

- Soft durable rubber tip stylus will not scratch, smudge or leave marks on your screen.
- Functions as a ballpoint pen for traditional note taking with smooth writing action.
- High quality, all-metal Construction for durability and rigidity.
- Pen uses standard Parker® Brand refills

Requirements

- Any capacitive touchscreen device

Package Contents

- 1 x Executive Stylus Pen
