GUD3C01

USB-C Dual 4K Docking Station with Power Delivery/ 90W Power supply

Easily add a full-sized keyboard and mouse, external hard drives, printers, webcams, and turn your laptop into a complete workstation.

USB-C™ Docking Station with Power Delivery

IOGEAR's USB-C Docking Station with Power Delivery is the perfect complement to your USB Type-C laptop. This all-in-one dock delivers a total of 10 ports in a unit designed to instantly connect and disconnect from your USB-C laptop through a single high speed cable. Featuring DisplayPort Multi-Stream Transport, USB 3.0 connectivity, HDMI, audio and Ethernet connections, this full-featured USB Type-C dock allows your laptop to perform like a desktop. While connected, the IOGEAR USB-C Docking Station will charge your laptop through the USB-C power delivery functionality. An AC power adapter is included.

Turn Your Laptop into a Workstation

Modern day laptops like the 2015 MacBook and Chromebook Pixel 2 have minimized the number of ports in the quest to be as thin and lightweight as possible. With IOGEAR's USB-C dock you can combine the portability of a laptop with all the functionalities of a full-featured workstation. Now you can easily add a full-sized keyboard and mouse, external hard drives, printers, webcams, etc. to turn your laptop into a complete workstation. A single USB-C connection replaces the need to set up your peripherals cable-by-cable which makes setup completely hassle-free and multitasking almost effortless.
