## Wireless USB Hub and Adapter Kit

### Unplug and Play

The Wireless USB Hub and Adapter Kit enables you to connect any USB device wirelessly to your desktop or laptop PC. With Wireless USB you get all the functionality of USB, without the cable clutter. By adding the Wireless USB Adapter to your PC, a wireless connection is made between your PC & the Wireless USB 4-Port Hub. Your PC can now wirelessly communicate up to 30-feet with any USB device that is plugged into your Wireless Hub in the same room as your PC.

- **Reduce Cable Clutter** - Move USB devices away from your laptop or PC to eliminate the hassle of cable organization and free up your desk space
- **Certified Wireless USB** - Seamlessly work with other Certified Wireless USB products
- **Wireless Freedom** - Works like a regular USB hub without the cable tangling while still maintaining the same USB 2.0 compatibility
- **Easy & Secure** - The kit provides everything you need to connect to USB devices wirelessly, no complicated network setup
- **Ultra-Fast** - Ideal for wirelessly streaming audio or video from USB storage devices across the room
- **Multiple PC Connections** - Access your USB devices from up to 8 Wireless USB enabled PCs and manually switch to the desired PC\*

*\*Each PC must be enabled with the Wireless USB Adapter or have Wireless USB built-in. Access is limited to one PC at a time. Maximum performance for wireless USB derived from Wireless USB 1.0 specification. Actual performance may vary, including lower wireless network capacity, data throughput rate, range and coverage. Performance depends on many factors, conditions and variables, including wireless distance, volume of network traffic, network overhead, building materials and construction, operating system being used, interference and other adverse conditions. A clear line of sight between Wireless USB Hub and Host adapter within 30 feet is recommended for optimal performance.*

### How does it work?

- Plug in the included Wireless USB Adapter to your PC
- Connect your USB printer, webcam, USB speakers, external hard drive, or other USB devices to the included Wireless USB Hub
- Print, play video files, or access your webcam wirelessly at blazing radio speeds of up to 480Mbps\*
