

## GVE130

## VGA CAT5e/6 Extender Kit (TAA Compliance)

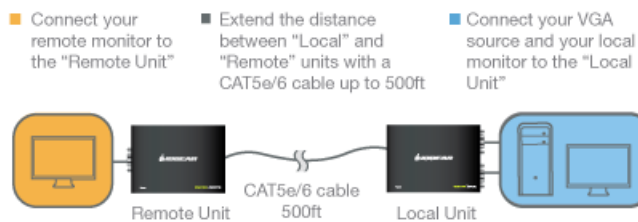

The GVE130 Video Extender System allows you to extend the distance between the computer system unit and the display monitor by up to 500 feet. It accomplishes this by means of a local transmitting unit and remote receiving unit, connected by standard Category 5 twisted pair Ethernet cable (or CAT5e and CAT6).

The GVE130 Video Extender System is ideal for any installation where the display needs to reside in a separate setting, but you want the system equipment kept in an environmentally friendly location. The Extender System is also useful for control and security purposes, where you can have the system unit in a secure area at the same time that you put the display in an area that is convenient for viewing.

- Uses CAT 5e/6 cable to connect the local and remote units up to 500ft (150m).
- Supports VGA, SVGA, XGA, SXGA and Multisync monitors
- High resolution video - Up to 1280 x 1024 from 500ft (150m) away
- 16 position adjustable video gain control
- Supports a local and a remote display
- Multiplatform support: supports PC, Mac, Sun, and Linux systems
- Supports DDC for the local monitor
- Sturdy design for long lasting durability
- Compact design for easy placement
- Easy installation
