

GWLRVGARX

Ultra Long Range Wireless VGA Receiver

600ft - Wireless VGA Receiver

The Ultra Long Range Wireless VGA Receiver is the latest addition to IOGEAR's extensive and award winning Wireless Video lineup. Wirelessly receive A/V signals from your source device such as PC via the wireless transmitters (GWLRVGATX for VGA Transmitter, sold separately), located at never before possible distances of up to 600ft (183m) line of sight.

Cut the Cord and Cut the Cost

With support for HD resolutions up to 1080p, you can cut the video cords without sacrificing picture and sound quality paired with a transmitter (GWLRVGATX, sold separately). Enjoy a stunning video experience with the convenience of wireless and the flexibility to network your environment the way you want without investing in expensive wiring. Effectively eliminate cable clutter and transmit powerful long range digital signals across wide open spaces, up to 600ft. No need to run expensive video cables at long distances.

Wireless Video Extender for Multiple Applications

IOGEAR's Ultra Long Range Wireless VGA Receiver is ideal for digital signage and applications where Audio and Video signals need to be transmitted long distances such as restaurants, retail stores, airports, houses of worship, concerts, sporting events and venues.

- Receives High Definition Video and audio signal from up to 600ft away
- Supports resolutions of up to 1080p @ 60fps
- Plug-N-Play solution
- Perfect for retail and commercial applications

Requirements

- **Display**
- Display or Projector with VGA Input
- **Media Source**
