NetShair Link Portable Wi-Fi Router & USB Media Hub

NetShair Link Portable Router and Media Hub

The new IOGEAR NetShair Link portable router and media hub provides Wi-Fi Internet connection, and allows you to stream your own movies, music, photos and files to all your wireless devices. The NetShair Link converts a wired Internet connection to Wi-Fi or shares an existing wireless Internet connection across multiple devices. Plug your USB flash drive or portable USB hard drive into the USB port and the built-in Wi-Fi connection shares the content with up to 7 devices within range.

More than just a great travel companion, the NetShair Link provides an all-in-one Internet and media sharing solution for apartments and smaller homes. Access the internet on your laptop, watch a movie from your library on your tablet, and stream music or photos to your smartphone- all at the same time! Connect to the NetShair Link using a web browser, or download the free NetShair App for iPod®/iPhone®/iPad® from the App Store or Google Play Store for Android® devices. With the NetShair Link from IOGEAR there is no reason to fight for TV control- everyone can watch a different movie right on their own mobile device!

Already have an external drive loaded with music, movies, etc.? Just plug it in and it's ready to use. Unlike competitive products that only support Windows formats, NetShair Link reads NTFS (Windows), HFS+ (Mac) and FAT32 formatted storage for true plug 'n play capability!

Mobile Router w/USB Media Hub

Access the internet and stream USB content to all connected devices
 Built-in USB 2.0 port allows connection of USB Flash drive or external hard drive for file sharing
 Compatible with Windows and Mac formatted storage devices
 Streams movies, music, digital files to Wi-Fi connected devices
